

Tissue Resulting via Doctors web-LinkSM and consulting using Doctors web-CyteSM

Starting 31 October 2005, Doctors Laboratory, Inc., (DLI) Pathologists will issue tissue reports using a new formatting style. We recently began issuing electronically signed reports and are now ready for the next evolution. The report will be formatted as illustrated below, including color photomicrographs.

Doctors web-LinkSM clients can review and print pathology tissue reports as soon as we release the final report rather than waiting for a hand delivered copy. This will significantly improve the Turn Around Time (TAT) – to generally less than 24 hours.

In addition, at Doctors web-CyteSM you may initiate an interactive consult with a member of our pathology team. Using your internet connection you may view real time images of cases while discussing the case over the telephone with a DLI Pathologist.
