Microbiology Specimen Collection Kits

Specimen Type: Stool, Sputum, fluid, aspirate, washings, tissue, scrapings, clippings, catheter, IUD, Urine for STD, etc.

Test	Test Description
117	Qualitative Fecal Fat (Sudan Stain)
124	Fecal Occult Blood
125	Ova & Parasite Exam. (O&P)
202	Stool Culture
210	Stool Gram Stain
221	Fecal Reducing Substances
235	Fecal WBC's Exam.
243	Clostridium difficile Toxins A/B (CDT)
282	Fecal RBC's Exam.
290	Giardia Detection
291	Cryptosporidium Detection
8311	Stool Profile-1 (includes Stool Culture, O&P Exam., WBC Exam, Occult Blood, CDT)
2261	Giardia/Cryptosporidium Combo.
201	Miscellaneous Culture
207	Fungus culture
208	Fluid Culture
222	Sputum Culture
2238	Chlamydia/GC Profile (Urine – REFRIGERATE)

Secure, sterile, screw-capped container with no preservative

ROOM TEMPERATURE

Specimen Type: Urine

- 219 Urine Culture – Routine
- 2233 Urine Culture for Group B Streptococci

Sterile, screw-capped container with **Boric Acid**

ROOM TEMPERATURE

OR

Sterile container
No preservative

REFRIGERATE!!

Specimen Type: Vaginitis testing by DNA Probe

AFFIRM VP-III Transport System

- 2235 Vaginitis Profile for Trichomonas, Gardnerella vaginalis and Candida detection

ROOM TEMPERATURE

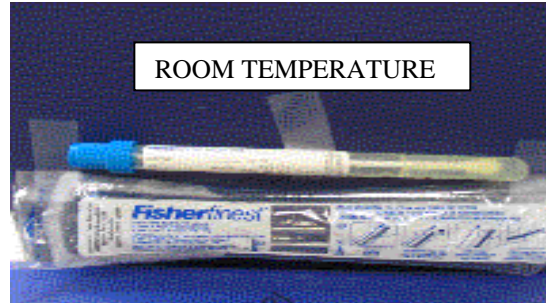

Doctors Laboratory, Inc.

Microbiology Specimen Collection Kits

Specimen Type: Body site – throat, wound, nose, eye, ear, genital, etc.

Culture Swab with Amies Transport Medium

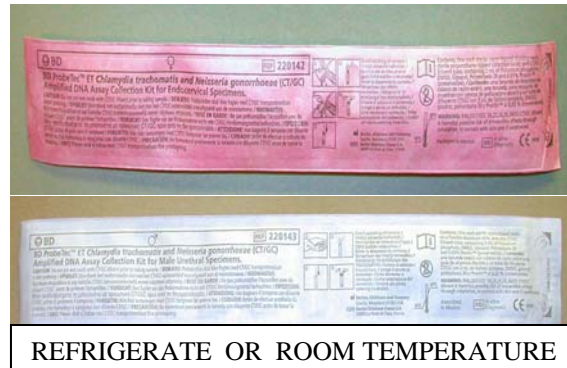

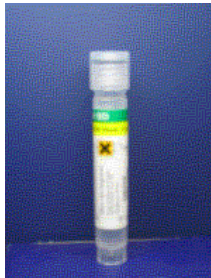

- 200 Throat Culture
- 201 Miscellaneous Culture
- 203 G.C. Culture
- 204 Wound Culture
- 207 Fungus Culture
- 209 Environmental Culture
- 210 Gram Stain
- 228 Anaerobic Culture (ONLY with Aerobic)
- 230 Throat Culture for Beta Strep.
- 2260 Group "B" Strep. (GBS) Culture
- 2263 Genital Culture

Specimen Type: endocervical or urethral swab for Chlamydia/gonorrhea testing By DNA Probe Method (For source other than genital, collect Chlamydia and Gonorrhea cultures)

8998 Chlamydia/Gonorrhea Testing by Amplified DNA Probe (STD-1 Profile)

ProbeTec tube - Female (Pink package) or Male (Blue package)

Specimen Type: Blood for Bacterial Culture

206 Blood Culture

BACTEC Brand blood culture bottles in PAIR (Aerobic and Anaerobic) OR one Pediatric

Specimen Type: Fluid, aspirate, exudate, tissue, swab for Virus, Chlamydia, Mycoplasma, Ureaplasma

Virus, Chlamydia Cultures and/or Antigen detection

Universal Viral Transport Kit

REFRIGERATE OR ROOM TEMPERATURE
